

# ViScope Palm

Video Microscope

ViScope Palm is the perfect tool to complete your workplace. It enables you to display objects like stencils, bare boards, components and solder joints magnified at a monitor.

The spring-loaded pin enables a quick finding of the object and allows to view objects at different angles. Even difficult accessible regions are easily to inspect.

The LED-lighting guarantees shadow-free images, which are rich in contrast.

The USB2.0 frame grabber allows documentation and measurement of fault images. Interchangeable lenses with different magnification are available too.

## Features:

Magnification 60x based on a 15"- monitor  
Field of view: appr. 5mm\*4mm
