

# ViScope CI

Video Microscope

ViScope CI is the perfect tool for inspection of micro coaxial and other fine wire cables. A special holder keeps the cable during winding always in focus of the camera. Just clamp the cable in the object holder and inspect it with a magnification of 35x at the standard 8" monitor. Due to the fixed optical distance, images are always sharp and focussing is not necessary.

USB2.0 frame grabber allows documentation and measurement of images.

The LED-lighting with long life-cycle keeps microscope free of maintenance.

The optional 5 Mega-Pixel digital camera performs highest quality in resolution and field of view.

## Features:

- Magnification 35x at 8" monitor
- Field of view: 4mm\*3mm
- Fixed focal distance due to special cable guidance
- LED-lighting with long life-cycle
- 8" Monitor
- High resolution PAL-camera

## Options:

- PC-Interface for image archiving
- Measurement tool
- Digital 5 Mega-Pixel camera
